

Jungle Journey

No sinking allowed- the camel.

Camels are said to be crabby . Maybe it is because there is so much sand where they live. Have you ever tried to run on the sand? It is hard isn't it? Camels should be happy that they don't have to get sand in their shoes— their feet are perfect for walking in the sand. Each foot has two big toes which spread apart with each step. The skin between their toes keeps their toes from sinking. Camels can do what they need to do without sinking in the sand.

Just like camels are designed to walk without sinking in the sand the Bible tells us that we have what it takes to avoid a sinking walk with God when we build our lives on him.

The Bible tells us that the foolish man built his house on the sand and the whole foundation cracked. The wise man built his house on the rock— it was built on Jesus. Make sure that you are always staying close to Jesus. He will not fail you.

“Therefore everyone who hears these words of mine and puts them into practice is like a wise man who built his house on the rock”

Matthew 7:24-27
